Coordinating Personnel: Sergeant Carolyn Richardson and Third relief officers.

Description of Problem: Parking Violation-business area

Phase of SARA: Assessment

## **SARA Documentation**

### Scanning (state problem):

Citizens are parking their vehicles in no parking zones which are creating a hazard for emergency vehicle. This is occurring mainly in business district on the public streets, in no parking location, around the Mt. Adams Bar District. This has been a problem for several years.

### Analysis (identify factual support):

Time frame being analyzed is during the Bar hours, normally 1900-0330 hours. January 1, 2006 thru October 1, 2006. A data report for parking complaints runs for service was analyzed. These conditions contributed to the problem of cars parked in violation create a hazardous condition for emergency vehicles, especially fire trucks. We hope to provide a safe parking environment and an area for all public safety vehicles to enter and exit without any delays.

### Response (define action taken):

Business owner, Fire Department and Police Officers assisted in the CPOP/problem-solving effort. They assisted us locating the problem parking areas. They also called in with the complaints for immediate action. This minimized the risk of harm to person or property by allowing a free flowing street for emergency personnel. The Bar business have detailed officers which monitor the area on a regular basis. Home owners and business owners/employee call the police and we immediately correct the problem.

### Assessment (document measurement):

**What are the results of your assessment?** This is an on-going project that will be assessed through community and officer perception. Officers are more aware of the problem and attempts are being made nightly to have any enforcement efforts in place before it creates a problem.
